Dear CCS 2020 Grant Chairs,

This letter is to confirm that Ziyi Zhang, the student I advised in the summer of 2019, is in good academic standing.

Ziyi worked on the project of VRLifeTime, which is published in this year's CCS (Demo: VRLifeTime -- An IDE Tool to Avoid Concurrency and Memory Bugs in Rust), during his visit as an undergraduate to my lab. He also published two co-authored papers: "Demo: Benchmarking Label Dynamics of VirusTotal Engines" at CCS 2020 demo, and "Measuring and Modeling the Label Dynamics of Online Anti-Malware Engines" at USENIX Security 2020. All papers are related to software and systems security. What's more, he won the second place at the SOSP'19 SRC. Therefore, I think he is in good academic standing.

Thank you!
Linhai Song
